

IT SYSTEM ADMINISTRATOR FULL-TIME

You will be responsible for delivering high quality day to day IT support to our engineers. You will maintain, support and expand easics' IT Infrastructure which is mostly Linux based. You will make decisions on future internal IT and propose them to our management, always keeping data security in mind. Eventually, you will know the ins and outs of our complete IT infrastructure, from kernel configurations to VM and container deployment. You will create, maintain and enforce easics' IT procedures.

DO APPLY IF:

- ▶ you have a Bachelor's degree in information technology or equivalent skills through experience
- ▶ you have a keen interest in IT networks, Linux and data security
- ▶ you already used (Debian based) Linux and know a minimum of how it works behind the scenes
- ▶ you have knowledge of Bash
- ▶ you are willing to solve problems and want to learn everything about all areas of IT
- ▶ you are an honest and open communicator with a strong sense of responsibility
- ▶ you're fluent in English

IT'S A PLUS IF:

- ▶ you have basic knowledge of Ruby
- ▶ you have knowledge of Dutch

From day one, you will get a lot of autonomy and responsibilities in your role. But no worries you will be trained by our senior system administrators and get all the support you need to learn and grow at your own pace.

You will work at the easics office in Leuven - Belgium, conveniently located within five minutes walking distance of the Leuven railway station and city center.

easics is an equal opportunity employer.
We value and recognize your talent with an attractive remuneration package.
